RE: 2016 Street Improvement Project

Dear Business:

Construction of **Home Avenue** has now reached the point that the contractor is ready to begin the pavement removal and replacement. This work is tentatively scheduled to begin on **Wednesday, August 3, 2016**. During this time, crews will be excavating out the existing pavement, base, and curb and gutter and installing a new stone base, hot-mix asphalt pavement and curb and gutter. This work will be followed by the restoration of the parkways and finally the installation of the new hot-mix asphalt surface course.

In order to allow this work to take place, businesses will not have access to their driveways for a period of approximately two weeks, weather and other circumstances permitting (unless other accommodations have been made). During this time, businesses will be allowed to park during the day and overnight on side streets, where permitted. The Villa Park Police Department will be notified of the need for this parking situation, and should accommodate businesses accordingly. **We ask that you please make arrangements to have all necessary vehicles out of your driveway by 6:00 AM on Wednesday, August 3, 2016.**

We fully understand that this work will be the most inconvenient portion of the project for businesses, but would like to emphasize that this will mark a substantial move towards completion of the project. This is the final step in completing the improvements to Home Avenue.

As always, all questions and comments regarding this project should be directed to the Engineering Division of the Village of Villa Park Public Works Department at (630) 834-8505. We also ask that any businesses with special needs contact us so that we can accommodate them as best as possible. We thank you for your continued patience, especially during this period of the project. If you have any questions or would like additional information, please do not hesitate to contact us.
